Subject: Microsoft Settlement

I believe that the proposed agreement is unjust. You will be forcing schools to have an open arena of technology. By forcing Microsoft down schools throat, I believe that schools, consumers, or anyone in general should have the freedom to choose any computing platform. Microsoft should be forced in giving the schools monetary amounts that then the schools can use at their will as to what platform to go to in the computing world. Otherwise Microsoft will continue its monopoly that is currently holds.

Thanks,

R. Molina
